[BRIH - SAY - DAH] | SHE / HER

Empathy driven problem-solver wielding the power of tech to build tools of disruption and restoration. Team-rooted creative who will always invite critical examination and radical improvement. Deeply proud of keeping it real.

[SKILLS]

Javascript, HTML, CSS, React, MVC and Redux
Design Patterns, React Hooks, Node, Express,
MongoDB, Mongoose, SQL, Jest, QUnit,
Enzyme, TravisCI, Heroku, Postman,
PostgreSQL, Compass, Webpack

[PROJECTS]

[AFFIRM.E](#) | [GITHUB](#) + [WEBSITE](#)

The need for affirmations of our existence, of our health, and our worth are more important than ever--this is the ultimate goal of our Affirm.e Twitterbot. This is a data-scraping backend project tying in dynamic packages, APIs and cron-akin tools such as Cheerio, Twit and Heroku Scheduler. Using Twilio, I upgraded our bot to offer the user text notification options.

[FETCHART](#) | [GITHUB](#) + [WEBSITE](#)

FetchART recognizes our information overconsumption and aims to give the "power of scroll" a new meaning. Using a vast image API and laborious prop drilling, we built a full-stack site that authenticates, verifies, and allows the user to "favorite". I approached privacy concerns by using PostgreSQL in the backend and persistent local token storage in the frontend to ensure credentials were db-accessible while remaining secret.

[CRYPTO-STIMULUS](#) | [GITHUB](#) + [WEBSITE](#)

This site is a growing database of grassroots organizations from which the user can research to redistribute their stimulus check. Eager to make organization info as accessible as possible, my team and I worked on thorough filter functions (category, donation type, etc). I worked heavily with CSS to facilitate effective user-experience and encourage immediate action.

[WORK EXPERIENCE]

[PAPERCUT SOFTWARE](#) | 2019 - 2020

As customer service specialist, my toolbox included Jira, Zendesk, Confluence and internal databases. I collaborated closely with tech and marketing teams to manage customer expectations, troubleshoot machine / software bugs, and build adaptive database.

[BLUE BOTTLE COFFEE](#) | 2013 - 2017

Within 10 months, I was promoted from Barista, to Cafe Leader, to Junior Trainer to Senior Trainer, eventually becoming sole Facilitator of the entire East Coast region. Made from scratch, I designed, tested, and delivered (also, translated) coffee-knowledge curriculum during major leadership restructures, mergers, and acquisitions.

[AWARDS]

[PDX WIT SCHOLARSHIP](#) | 2020

The purpose of PDXWIT is to encourage and support women, non-binary folks, and under-represented identities join and stay in tech. If viewing resume digitally, follow above link for more information.

[EDUCATION]

[ALCHEMY CODE LAB](#) | 2020

Rigorous 800+ hour full-stack development training program using MERN stack.

[UNIVERSITY OF CHICAGO](#) | 2008 - 2012

B. A. in Anthropology, Archeology minor
