## BRIH - SAY - DAH || SHE / HER

Empathy driven problem-solver wielding the power of tech to build tools of disruption and restoration. Team-rooted creative who will always invite critical examination and radical improvement. Deeply proud of keeping it real.

## SKILLS

Javascript, HTML, CSS, JSS, React, MVC and Redux Design Patterns, React Hooks, Node, Express, MongoDB, Mongoose, SQL, Jest, QUnit, Enzyme, TravisCI, Heroku, Postman, PostgreSQL, Compass, Webpack

## PROJECTS

### FLORAFILE | [GITHUB](#) + [WEBSITE](#)

Fullstack / Frontend heavy open-access plant encyclopedia centering accessibility by providing Color Blind toggle and "top search" suggestions to the user; application is fully web-responsive and mobile-friendly. I facilitated site-wide visual accessibility by designing B/W theming systems and key global variables activated through a single click of a button.

### AFFIRM.E | [GITHUB](#) + [WEBSITE](#)

Backend application posting daily to a twitterbot fed affirmations from a database seeded with (Cheerio) web-scraped data. Uses Twitter API client (Twit) and randomization/verification logic to publish non-repeating data objects; manages user meta-data via Twilio to enable SMS messaging. I was scrum organizer, while working on scraping logic and Twilio.

### FETCHART | [GITHUB](#) + [WEBSITE](#)

Fullstack visual meditation space counterpointing "doomsday scrolling" through the power of emotions. The backend fetches data from and prop drills into a vast image API. I focused on user models / signup+login routes seeding and updating user's "Favorites" collection; also, collaborated on pagination logic and keyword filtering in URL params.

### CRYPTO-STIMULUS | [GITHUB](#) + [WEBSITE](#)

Fullstack wealth redistribution site connecting users to grassroots organizations in PDX and surrounding areas. Data is hard-coded in the backend and deployed on Heroku. Service calls in the frontend use filter functions to suggest organizations compatible with the user. I worked predominantly on site-wide CSS styling and event handlers on click.

## WORK EXPERIENCE

### PAPERCUT SOFTWARE | 2019 - 2020

As customer service specialist, my toolbox included Jira, Zendesk, Confluence and internal databases. I collaborated closely with tech and marketing teams to manage customer expectations, troubleshoot machine / software bugs, and build adaptive database.

### BLUE BOTTLE COFFEE | 2013 - 2017

Within 10 months, I was promoted from Barista, to Cafe Leader, to Junior Trainer to Senior Trainer, eventually becoming sole Facilitator of the entire East Coast region. Made from scratch, I designed, tested, and delivered (also, translated) coffee-knowledge curriculum during major leadership restructures, mergers, and acquisitions.

## AWARDS

### PDX WIT SCHOLARSHIP | 2020

The purpose of PDXWIT is to encourage and support women, non-binary folks, and under-represented identities join and stay in tech. If viewing resume digitally, follow above link for more information.

## EDUCATION

### ALCHEMY CODE LAB | 2020

Rigorous 800+ hour full-stack development training program using MERN stack.

### UNIVERSITY OF CHICAGO | CLASS OF 2012

B. A. in Anthropology, Archeology minor
