

Briseida Pagador

Software Engineer || Portland, OR

201.577.8898 | bpagador@gmail.com | [Portfolio](#) | [Github](#) | [LinkedIn](#)

SKILLS

Javascript, HTML, CSS, JSS, SQL, React, Redux, Node, Express, MongoDB, Mongoose, Jest, QUnit, Enzyme, TravisCI, Heroku, Postman, Compass, Webpack

TECHNICAL EXPERIENCE

Florafile | [Github](#) + [Website](#)

Fullstack / Frontend heavy open-access plant encyclopedia

- Created Accessibility theming system with JSS to facilitate site-wide Color Blind toggle
- Helped with NoSQL (MongoDB) database architecture ideal for storing and projecting most popular user searches on site's auto-fill search bar
- Designed web-responsive and mobile-friendly UI using media queries and breakpoints

Affirm.e | [Github](#) + [Website](#)

Backend application posting daily affirmations to a Twitterbot

- Researched and delivered proof of concept for Cheerio, Twit, and Twilio use cases
- Led and supported team agility as Scrum organizer
- Constructed randomization/verification logic ensuring quality control of all scraped data objects

FetchArt | [Github](#) + [Website](#)

Fullstack visual meditation space counterpointing "doomsday scrolling"

- Developed meticulous prop-drilling strategy targeting RESTful API despite limiting endpoints
- Architected backend authentication routes using JSON web tokens, cookies (RIP), and local storage
- Helped with pagination and keyword functions filtering through 2.2 million object properties

CryptoStimulus | [Github](#) + [Website](#)

Fullstack wealth redistribution site centering grassroots orgs in PDX/surrounding areas

- Transitioned hardcoded data living in frontend JS file to a backend deployed on Heroku
- Created service calls to enable filter functions matching users with preferred orgs
- Delivered polished UI design on a 24-hr deadline using CSS

RELEVANT PROFESSIONAL EXPERIENCE

PaperCut Software | 2019 - 2020
